

PRESS RELEASE – RE-ISSUE - New Natural Gas Conversion Rebate Program

For immediate release:

July 19, 2007

The Nova Scotia Natural Gas Association (NSNGA) is pleased to announce the creation of a new residential and small/medium commercial rebate program that provides property owners funds to convert their existing homes and businesses from their present fuel source to natural gas.

The new program is retroactive to April 1, 2007 and will be in effect for one year.

“This is great news for the natural gas industry,” said Don Webster, President, NSNGA. “The new rebate program is essential to the continuing development of the natural gas industry in Nova Scotia.”

The NSNGA is pleased to have worked with Heritage Gas and the Department of Energy in the establishment of the funding. Offshore gas producers contribute to the Natural Gas Market Development Fund and this money forms the basis of the rebates.

The Nova Scotia Natural Gas Association aims to promote the common interests of the natural gas industry for the benefit of industry stakeholders and their customers. The Association works to promote the benefits of natural gas technology through public education programs and to work proactively with industry and government offices to ensure effective regulation of the industry.

Heritage Gas will administer the new rebate program. For more detailed information on the new rebates contact Heritage Gas at 466-2003.
